Abacus software. Abacus flight.

Something went wrong. Wait a moment and try again. What is Abacus Travel Software? Abacus is a leading travel technology provider that has developed technological advancements to meet the evolving needs of travel agents and suppliers. Abacus Travel Software is a fast and effective system to ensure that all your air-to-hotel bookings to tour packages are hassle-free. You can also reserve a car or a transfer with a single tap. It is a cost-effective solution for travel companies and tour operators worldwide. Abacus GDS is used by the travel sector globally to connect buyers and sellers via an agency, online, and corporate travel channels. Via a unified platform, the Abacus travel software connects travel agents with an airline, hotel, car rental, rail, and other service providers. Abacus GDS (global distribution system) and Abacus API integration allow travel agencies to increase operational efficiency to achieve corporate needs. Abacus software connects the best travel service providers in the industry and allows you to select from a range of options. If a travel agency desires to expand, it must implement an effective global distribution system, and Abacus GDS software is the best option. Abacus travel software has given rise to a computerized reservation system catering to the needs of the customers and the travel agents. Abacus travel software makes it quick and easy for travel agencies to connect to the different suppliers in the travel sector. Travel companies use Abacus GDS to find the best airline ticket, car rental, hotel rooms, etc. for their clients. Information is customized and by the travel companies based on the preferences and itinerary. When a traveler requests information from a travel company, the agent will find the most accurate and cost-effective itinerary. Many travel agencies all over the world use the Abacus GDS as their primary booking channel. It is also responsible for the significant growth of the travel industry. Why does the travel agency require Abacus Software? If you are an aspiring travel agency and are searching for a reliable platform to start or take your business to the next level, integration with the Abacus Travel Software can be an ideal choice for you. Abacus GDS software is now essential in the online reservation system. This framework includes XML resources as well as desktop applications that are connected to the primary database. Abacus GDS provides access to a world of content and functionality via web services APIs and desktop connections. The Abacus system is being integrated by major airlines, hoteliers, travel agencies, car hire companies, rail carriers, and cruise operators. Its remarkable features include flight schedules, pricing policy, product availability, booking, and ticketing status. Customers can shop through hundreds of potential airlines, thousands of hotels, vacations, and car rental subcontractors by integrating Abacus into your application or travel platform. Abacus system has all the competencies and benefits to succeed in the long run, not only because it's a comprehensive travel management system, but also its diversity in aggregating travel contents. Over 100,000+ travel agencies worldwide, use the Abacus GDS system and software platform. The Abacus system is a huge database that stores and updates huge amounts of data about inventory and hotel rates for travel agents and websites. This system is responsible for the exponential growth of the travel industry and served as the base for the majority of internet-based travel services. Travel agents/agencies can use this system to access real-time availability, pricing, and offers of flight tickets, hotel rooms, rental cars, cruises, cruise reservations, trains, and other services. As a leading travel technology company, Trawex strives to deliver a travel portal solution or custom travel apps, whether B2B, B2C or corporate. When we build your travel platform, we make sure that it allows for seamless online bookings. This is why we recommend integrating Abacus booking software into your travel web portal. Abacus travel reservation system plays an important role in airline reservation software and is connected to almost all of the major airlines. It also provides solutions to travel agencies, such as desktop solutions (search and book) and XML web services for connecting to the core database. To book a flight, the customer simply needs to use the Abacus airline booking system. With the Abacus Airline System, you get access to several significant factors such as reservations, inventory management, passenger profiling, and PNR generation. Trawex's software, which is pre-integrated with an Abacus GDS System, allows travel agents, end-users, or corporations to access and book flight tickets, rental cars, hotel rooms, tour packages, and other travel products. Having all of that data in one place, with a user-friendly interface, will assist you in maintaining brand integrity and gain a competitive advantage. Furthermore, Abacus Software provides proficient and robust travel portal solutions that enable agents to deliver complete travel packages in a fast and effective manner. What Do You Get With Abacus Software Integration? Trawex, an Abacus software company, provides Abacus GDS integration services to global travel agencies and travel management companies in delivering robust travel software solutions. We integrate the Abacus reservation system for accessing the comprehensive inventory of flights, transfers, and even hotels through Abacus. Trawex remarks that travel management companies, travel agencies, tour operators globally are empowering Abacus GDS to access online travel contents which consists of airlines, hotels, sightseeing, cars, transfers, and other travel services. As a result, we seamlessly integrate the Abacus GDS to expand our clients' travel offerings. Trawex is known to deliver improved ROI, assisting in customer retention and even increasing sales. Consequently, we leverage the Abacus booking engine to connect travel providers with the consumers and break down the barriers to seamless and effortless travel. With our aid, you can harness the Abacus booking engine for effectively running your business. We assist you to get all the features offered by Abacus such as its real-time availability, booking, pricing, and consolidated display of data. However, we are dedicated exclusively to meeting the demands of the global travel industry. Abacus software helps the entire travel industry discover and enhance its revenues. It assists agencies in developing new revenue streams and even making profits after-sales. Abacus software allows the tourism sector to discover and maximize its profitability. Abacus travel systems are used by a wide range of travel sectors, from global network airlines to low-cost carriers, from major travel agencies to independent hotels, to develop efficient business ecosystems and gain a competitive edge. Trawex can assist you in using Abacus to expand your market reach, attract new customers, and provide up-selling and cross-selling opportunities. In short, with Abacus' custom travel tech tools, you can start to leverage the online channel more efficiently. As a result, Abacus is highly beneficial for travel agencies to remain competitive and increase profits. How does Abacus Travel Systems help in growing a travel agency business? Abacus travel software has given a new dimension to the travel intermediaries like travel agents, tour operators, and reservation system operators. Customers now have a highly integrated solution that combines customizable travel booking controls with the power of real-time expense reporting with Abacus Travel. The Abacus travel system contains a wealth of useful data that OTAs can use to showcase to customers. Travel agencies can access real-time inventory and pricing for airlines, hotels, and other suppliers from a single platform. Abacus software delivers business solutions for travel agencies, corporations, airlines, hotels, railways, car rental companies, airline companies, and cruise operations. Abacus Travel Software provides access to travel data to travel companies, agents, and their customers by comparing prices, booking options, access schedules, and inventories (hotels, airlines, car rentals, holidays, bus fares, holiday packages), as well as allowing customers to book tickets online. Abacus reservation systems are used widely by independent travel agents, online agents, and travel agencies to find the best available travel and accommodations and rates for their clients. Agents will make real-time flight and hotel bookings for clients, and their research and bookings will be completed in minutes. Integrating with abacus travel software enhances the online booking system of the travel agency website and provides better rates and facilities for online flight bookings, hotel bookings, rail bookings, vacation rentals, and insurance, thus increasing the chances of providing a better service through the technical implementation that helps the travel agent corporation to grow in long term. Why Choose Trawex for Abacus GDS Integration? Trawex is a well-known name in the travel portal development industry that assists online travel agencies (OTAs), especially IATA agents, in integrating with the Abacus software and connecting to the Abacus central reservation system. Integration with the abacus travel software helps the travel agents to get connected to more inventories related to airlines, hotels, car rentals, cruise, bus booking, and rail booking. The custom reporting module and CRM module developed by our GDS developers facilitate the smooth operation of the travel agency system. When we build your travel platform, you will have access to seamless online booking as well as an online travel management tool that integrates with Abacus. The portal will collect real-time data. This will include 'live availability information for flights and fares for airlines, including low-cost carriers on domestic and international markets, as well as hotels and car rental. Abacus travel software offers solutions for airlines, hotels, car rentals, railways, travel insurance, and travel agencies, and thus integrating the Abacus GDS system assists in managing and distributing information about the airline, hotel, rail, and other services from various channels and distribution. We help you gain decisive competitiveness with our comprehensive Abacus System integration services. Abacus travel Software offers significant advantages to travel agents, such as pricing, availability, and booking capabilities. We integrate Abacus GDS web services to provide world-class OTA platforms to global travel management companies. We use Abacus APIs to access inventory for flights, hotels, transfers, rail, and cruises via web services provided by Abacus. The client's credentials are used for authentication and data processing. Our developers can integrate the Abacus GDS to unlock the inventory of all related to travel, such as airline tickets, hotels, cars, and cruises. This is made possible by Abacus's online services. The integration will increase your business value, improve operational efficiency, and increase productivity. It will assist you in developing and capture new market opportunities in real-time while lowering your operating costs. Key features of Abacus GDS System: Powerful search abilities and sorting functionality Unique capability of rate negotiation Efficient Geo-coding Enhanced graphical user interface Enhanced potential commission Seamless integration 24*7 real-time access to a worldwide inventory of hotel rooms, cars, airlines, buses, tours, and other travel-related items. Easy connectivity and content mapper Expand your coverage effectively with travel agents and agencies New distribution channels open to inventory Eased connection flexibility Exposure to worldwide Inventory Access for both B2C and B2B travel booking engines. The Abacus GDS software can easily be implemented on Android, iOS, and Web platforms. Provides access to real-time pricing and availability to make online bookings.
